SERIES SPECIFICATIONS

A self-tapping screw is designed to create its own hole in wood, plastic or metal materials as it is being driven (it does not necessarily require a pilot hole). Tapping screws are beneficial in applications that involve consistent maintenance and are especially helpful when two different materials are being attached together. This tapping screw features a washer head to distribute pressure, reducing the risk of crushing material around the hole

PHYSICAL SPECIFICATIONS

Primary Fastener Type

Screw

Secondary Fastener Type

Tapping

Head Type

Hex Washer

Driver

Hex

Material

Zinc Coated Steel

Size

#12

Length

1/2

Pkg Type

Jar

Pkg Qty

100
