## SERIES SPECIFICATIONS

A self-tapping screw is designed to create its own hole in wood, plastic or metal materials as it is being driven (it does not necessarily require a pilot hole). Tapping screws are beneficial in applications that involve consistent maintenance and are especially helpful when two different materials are being attached together. This tapping screw has a pan head and a flat bearing surface. The combination drive accepts both Phillips and slotted drivers.

## PHYSICAL SPECIFICATIONS

**Primary Fastener Type**

Screw

**Secondary Fastener Type**

Tapping

**Head Type**

Pan

**Driver**

Combo

**Material**

Zinc Coated Steel

**Size**

#10

**Length**

1/2"

**Package Type**

Jar

## ORDERING INFORMATION

**Package Qty**

100
