

# UV-BLACK INSULATED LUGS

## FAST WIRE INSULATION

Made with UV and abrasion resistant plastisol, quickly splice wires in a safe and secure insulated housing.

- ▶ UV-black insulated
- ▶ Anti-oxidation compound prefilled inside channels
- ▶ No taping required
- ▶ Multiple outlets for a wide range of cables

### FASTER & SAFER ALTERNATIVE

When compared to traditional splice methods, F4P multi-tap connectors install faster and safer, requiring only a few tools and do not require taping.

### LONG LASTING CONNECTIONS

Each channel features preinstalled anti-oxide compound to maintain the longevity of each connection. Coupled with the UV-resistant plastisol, these connectors are built to last.
